

Notes SMS

Sending text messages from IBM Lotus Notes has never been easier than with Red Oxygen's Notes SMS software.

- ✓ Calendar reminders
- ✓ Scheduled SMS
- ✓ Forward email to your cell phone
- ✓ Use your Notes address book
- ✓ Text message replies to your Notes inbox

ABOVE: sending a message from Lotus Notes using Notes SMS

Features

- Seamless Integration with IBM Lotus Notes, click the "New SMS Message" button on your IBM Lotus Notes toolbar. Your text messages are stored in the inbox and sent items folders, just like email.
- Notes SMS can scan your Notes calendar and automatically send notifications and appointment reminders to your cell phone as a text message.
- Text message recipients can be selected from your personal or global address book, a copy of the text message can be sent to each recipient's email address.
- Schedule a text message to be sent at a future date and time; these will be delivered even if your computer is turned off.
- Just like an email, you can create a signature to let recipients know who the text message is from.
- SMS replies are sent to your email or phone.
- Change the sender ID number to show your business name or mobile number. Not available on in the Americas or on CDMA networks.
- Manage daily text message usage, view reports, and much more.
- Schedule SMS in advance for important reminders and alerts.
