

Web Admin

ABOVE: view message reports via the Web Administrator

The Web Administrator allows you to manage your account by viewing reports, creating cost centres, changing passwords, adding users, viewing invoices and more!

- ✓ Text message reports
- ✓ Cost centres
- ✓ Manage users
- ✓ Configure authentication settings
- ✓ Purchase credits

Features

- Graphical and table-based reports can be generated for individuals or groups of users, known as "Cost Centres". For a given period, it is possible to see how many SMS have been sent, who the messages have been sent to and a number of other useful metrics.
- The Web Administrator supports multiple levels of access within a customer's account. For administrators with sufficient access, there are tools to create and manipulate users accounts
- User Usage Control: You can manage how many text messages a user sends within a 24-hour period.
- Your invoices show usage pertaining to individual users or cost centres for easy calculations.
- Purchase credits 24/7 with instant activation.
- Configure authentication settings such as adding IP addresses.
