

Win SMS

ABOVE: scheduling SMS from desktop Win SMS

Win SMS enables you to send text messages from the convenience of your desktop. Use your windows address book or create a new list, simply type your message or use a saved template and click "send".

- ✓ Easy to use
- ✓ Launch from the desktop
- ✓ Scheduled SMS
- ✓ Templates
- ✓ Use your Windows address book
- ✓ Text message replies to your email inbox or phone

Features

- Win SMS gives you the option to schedule a text message to be sent at a future date and time. Because your scheduled messages are stored on the Red Oxygen server, they are sent even if your computer is turned off.
- Just like an email, you can create a signature to let recipients know who the text message is from.
- Send instant SMS to any individual or group.
- Seamless Integration with Microsoft Windows.
- Save time by using saved templates.
- SMS replies are sent to your email or phone.
- Change the sender ID number to show your business name or mobile number. Not available on in the Americas or on CDMA networks.
- Manage daily text message usage, view reports, and much more.
- Text message recipients can be selected from your Windows address book, and you can even choose to have a copy of the message sent to each recipient's email address.
